Manage your lift truck fleets with ProFleet.

Raymond's exclusive ProFleet Fleet Management Software is designed for warehouse maintenance managers, operations managers, or any professional interested in tracking and reducing overall warehousing, lift truck and related equipment costs.

ProFleet can be installed on any Windows® 2000 or XP® based PC, and is easy and simple to use. If you can browse the Internet, you can be up and running with ProFleet in a matter of minutes.

ProFleet captures parts and labor costs by truck and generates straightforward utilization and cost per hour reports. Custom reporting capabilities are endless. Unlimited user defined queries let you manipulate and analyze your data to best fit your needs.

ProFleet helps you schedule routine maintenance tasks by date, truck, facility, unit number, model type, and more. It also flags overdue trucks to help you improve up-time and drive down unnecessary costs.

Turn data into knowledge and knowledge into peace of mind. Schedule maintenance, track repairs, reduce costs, increase your uptime. Do it all with ProFleet Fleet Management Software.

Contact your local Raymond Dealer for your free evaluation copy.

ProFleet™ Fleet Management Software

Main Data Entry Page

Create and edit service orders using pertinent data including: truck type, start/end dates, purchase order number, work order number, deadman hours, downtime hours, work order type, and more. Associate multiple tasks with each service order to allow for tracking of parts, labor and unique failure codes.

Easy Sorting and Analysis

Filter service order records by using any or all of ten different criteria including: service order number, truck, model type, facility, date, work order type, failure code, billing account, task or part.

Reporting

ProFleet includes the following standard reports:

- Cost Per Hour
- Utilization
- Scheduled Maintenance Status

Add/Edit Pages

Add/edit records including: truck, part, facility, billing account, failure code, labor rate, task ID list and work order type.

Minimum System Requirements: PC with 300 MHz or higher Intel Pentium® or Celeron® processor, or ADM K6®, Athlon™ or Duron™ processor, Microsoft® Windows® 2000 or XP® operating system, 128 MB of RAM, 650 MB of available hard-disk space, VGA (800x600) or higher resolution video adapter and monitor (Program is designed to display a full screen without scroll bars at 1024x768), CD-ROM drive, keyboard and mouse or compatible pointing device, Internet Explorer 6.0 or higher, Acrobat® Reader 5.0 or higher.
